

## Noise Floor VK7TW QTH G5RV (No BPL)

Noise floor measurements for 1.8, 3.5, 7, 10, 14, 18, 21, 24 & 28MHz undertaken using the [FSM application](#), Yaesu FT-847 and G5RV 104foot dipole, prior to the installation of BPL equipment in September 2007 in Wentworth St, South Hobart, Tasmania, Australia. "Residential and Rural ITU" are the expected ambient noise levels (ITU-R P.372-8) for a residential and rural area for a bandwidth of 2481Hz for comparison purposes.
